To be part of an enthusiastic work environment, where I can enhance my knowledge and I can grow and learn from experienced team members and apply my skills to accomplish organization goals.

Education

B.E Computer Science 2021 - 2025
Chandigarh University
CGPA-7.7

XII (Science) 2019 - 2020
CBSE, Hisar

X 2017 - 2018
HBSE, Bhiwani
CGPA-8.3

Projects

Netflix Clone

I designed and developed a fully functional Netflix clone, a web application that replicates the core functionalities of the popular streaming service, as a showcase of my web development skills. The project was created to demonstrate my proficiency in front-end and back-end technologies, along with database management and user authentication.

Technologies Used:

HTML
CSS
JavaScript
Database management using MySQL
Responsive design with CSS media queries
Deployment on Heroku for public access

This Netflix clone project showcases my ability to create a sophisticated web application, incorporating both front-end and back-end technologies to deliver a seamless user experience. By mimicking a popular streaming service, I demonstrate my aptitude for working on dynamic, data-driven platforms while adhering to industry best practices and design patterns.

Fitness Tracker:

As a passionate web developer, I conceptualized and developed a cutting-edge Fitness Tracker web application, catering to health and fitness enthusiasts seeking an efficient way to monitor and achieve their fitness goals.

Benefits:

The Fitness Tracker web application exemplifies my proficiency in web development, showcasing my skills in front-end design, back-end development, database management, and user authentication. Additionally, this project highlights my passion for creating impactful applications that cater to users' specific needs and improve their overall well-being.
